

RS2 Cylinders Re-Programming locks to high security

PROGRAMMING

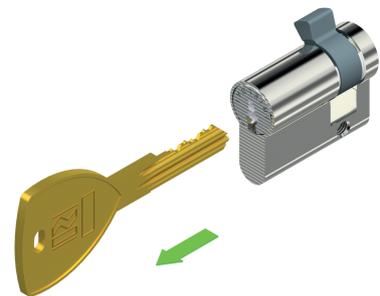

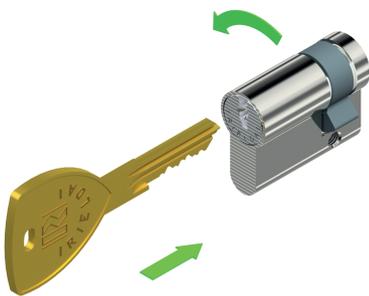

- Insert the gold programming key
- Turn the gold key back and forth a few times without completing the rotation (about 30°)
- Half turn the key

- Remove the key
- The lock is now programmed. Put away the gold programming key in a safe place and use the silver key

For a double cylinder, also re-program the second side of the cylinder

RS2 Cylinders Re-Programming locks to high security

RE-PROGRAMMING

- Insert the gold programming key
- Half turn the key

- Remove the key
- The lock is now ready to be programmed with a new key

For a double cylinder, also re-program the second side of the cylinder
